

NARENDRAN D

Computer Science Engineering Student | Web Development Intern Aspirant

Chennai, TN • +91 9444297878 • narenwwcd@gmail.com • linkedin.com/in/narendran-d • github.com/naren-wwcd

PROFESSIONAL SUMMARY

Computer Science undergraduate with proven backend engineering skills: built a production-ready banking REST API using Java, Spring Boot, and MySQL, and hold an industry-recognised RHCSA certification. Experienced with MVC architecture, Git-based workflows, and API testing via Postman. Ready to contribute to full-stack web development teams from day one — bridging backend strength with a growing frontend skillset to deliver reliable, scalable features.

EDUCATION

Sri Sairam Institute of Technology, Chennai

2024 – 2028

B.E. Computer Science & Engineering | CGPA: 8.44 / 10

CERTIFICATION

Red Hat Certified System Administrator (RHCSA)

Issued by Red Hat, Inc.

Vendor-neutral, hands-on Linux administration certification demonstrating expertise in system configuration, networking, storage management, and security hardening — directly relevant to deploying and maintaining web application servers.

TECHNICAL SKILLS

Languages: Java, C, Python

Web & APIs: Spring Boot, REST APIs, JSON, HTTP/HTTPS, API Integration, Postman

Frontend: HTML5, CSS3

Database: MySQL, SQL, RDBMS, Database Design

DevOps & OS: Linux (RHCSA Certified), Git, GitHub, Shell Scripting, Server Management

Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA

CS Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, MVC Architecture

PROJECTS

Banking Management Backend System

Java · Spring Boot · MySQL ·
REST APIs

github.com/naren-wwcd/banking

- Built a production-ready RESTful backend supporting full ATM and core banking operations with robust exception handling and input validation.
- Designed and implemented API endpoints for account creation, balance inquiry, deposit, withdrawal, and fund transfer — following REST best practices.
- Architected a clean layered MVC structure using Spring Boot, reinforcing separation of concerns, testability, and maintainability.
- Integrated MySQL for persistent relational data storage with optimised schema design for customer and account entities.

SecureWipe — E-Waste Reduction Tool

Python · Blockchain (In Progress)

- Developed a command-line data-wiping utility to securely erase hardware before disposal, enabling safe reuse and reducing premature hardware retirement driven by data-leak concerns.
- Implemented a multi-pass overwrite algorithm in Python ensuring complete and irreversible data destruction in compliance with secure erasure standards.
- Integrating a blockchain audit layer to produce tamper-proof wiping logs, enabling enterprise-grade compliance and traceability for IT asset disposal workflows.

ACHIEVEMENTS

- Achieved 60+ solved problems on LeetCode across Arrays, Strings, and Linked Lists, demonstrating consistent algorithmic problem-solving discipline relevant to backend engineering roles.
- Secured 3rd Prize in Solveathon, a college-level hackathon, demonstrating rapid prototyping and teamwork under pressure.

COURSEWORK

Data Structures & Algorithms · Object-Oriented Programming · Database Management Systems · Operating Systems · Computer Networks

ADDITIONAL INFORMATION

Spoken Languages: English, Tamil **Soft Skills:** Problem Solving, Analytical Thinking, Team Collaboration, Quick Learning, Attention to Detail
